

AEA wins EDIE award for climate change and renewables

AEA have been voted the consultancy with the best reputation for climate change and renewable by their peers as part of the 2008 edie.net Consultancy Survey. The award was voted for by consultants in the environmental consultancy sector as part of the annual EDIE Awards.

AEA is one of the world's leaders in the field of climate change and energy consultancy - operating in the UK, Europe, the US and China. It is the leading provider of advisory services to the Climate Change Committee and works extensively with the UK Government, the EU and major private sector organisations.

Commenting on the award, Gill Hall, Director of Sales and Marketing at AEA said:

“AEA are delighted to have won the EDIE Award for consultancy with the best reputation for climate change and renewables. The fact that it was voted for by our peers in the environmental consultancy sector confirms our world class standing on advising on climate change and energy issues”

“Alongside AEA’s other areas of specialism such as air quality, transport and resource efficiency, we intend to continue to build our leadership position in climate change and renewable energy, both in the UK and internationally. This year has already seen an expansion into the US market with the acquisition of Project Performance Corporation”.

Notes to Editors:

AEA Technology is one of the world's leaders in the field of climate change and energy consultancy - operating in the UK, Europe, the US and China. It is the leading provider of advisory services to the UK Government and works extensively with the EU and major private sector organisations. With internationally renowned expertise in air quality and climate change, carbon management, resource efficiency and the environmental impacts of transport, AEA employs many world leading experts and provides a high-level of policy consultancy and a range of technical services to its public and private sector clients.

Recently, AEA completed a six-year environmental audit assessment on one of the world's largest integrated oil & gas projects, Sakahlin II in Russia, it is the manager for the UK government's Envirowise project, one of the world's largest resource efficiency programmes and provides carbon management expertise to many of the UK's largest private sector organisations. It is also supporting BT in the roll out of its £250 million programme to develop wind power sites that aims to generate 25% of the Company's electricity generation needs by 2016.
